### CLG 452: Linguistic Data 2

## Course Project Report

(Due: 27/04/20)

Instructor: Dr. Parameshwari Name: Zubair Abid, Roll Number: 20171076

### 1 Tags

Discussing the results of AnnCorra and UD tagging in my chosen Indian Language, Bengali.

#### 1.1 UD

Based on the results of tagging 100 sentences with UD tags, we present the following results. It is to be noted that a number of issues arise from tying to tag bengali with UD tags, including but not limited to a dearth of tags for specific use cases, requiring the use of a general tag covering all the various nuanced use cases that are present in the language. A detailed analysis will be provided later.

# 2 Linguistic Challenges with Annotation

- (a) Differential Object marking
- (b) Non-Nominative Subjects
- (c) Complex Predicates
- (d) Non-finite clauses: Conditional, Concessive, Relative, participial clauses
- (e) Ambiguity (Coordination, Attachment)
- (f) Ellipsis
- (g) Non-projectivity Ex 1: I saw a man yesterday who was singing Ex 2: A hearing is scheduled on the issue today Ex 3: To his wife, John gave a fantastic gift Ex 4: Which house, John bought?
- (h) Particles

# 3 Tag Statistics

Statistics have been compiled for UD and AnnCorra tagging of the provided Hindi datasets.

# 4 Error Analysis for automatic tagging

In this section, describe the errors in the output of your model trained in Assignment 4 on the test data. Give possible solutions, if any, to mitigate these errors in the future.

### 5 Discussion

## 5.1 Comparison of UD and AnnCorra

## 5.2 Need for new tags

#### 5.2.1 Intra-Chunk

propose any new intra-chunk tags you can think of with examples

#### 5.2.2 Inter-Chunk

propose any new inter-chunk tags you can think of with examples.
