### CLG 452: Linguistic Data 2

# Course Project Report

(Due: 27/04/20)

Instructor: Dr. Parameshwari Name: Zubair Abid, Roll Number: 20171076

## 1 Tags

Discussing the results of AnnCorra and UD tagging in my chosen Indian Language, Bengali.

#### 1.1 UD

Based on the results of tagging 100 sentences with UD tags, we present the following results. It is to be noted that a number of issues arise from tying to tag bengali with UD tags, including but not limited to a dearth of tags for specific use cases, requiring the use of a general tag covering all the various nuanced use cases that are present in the language. A detailed analysis will be provided later.

Tag	Examples	Linguistic Cues
$\mathbf{nsubj}$	<b>bijepi</b> korbe kal shukrobar	POS: Noun

Table 1: Discussion on UD tags

### 1.2 AnnCorra

Based on the results of tagging 100 sentences with AnnCorra tags, we present the following results. While the issues with AnnCorra are less pronounced than that of UD with regards to ambiguity, several concerns remain: including but not limited to a general confusion over the applicability of tags in cases and weak intrachunk relations. A detailed analysis will be provided later.

Tag	Examples	Linguistic Cues
 k1	bulabulite dhAna kheYechhe	POS: Noun; Suffixes: -te
	AmAra shIta karachhe	POS: Pronoun, Suffixes: -Ara
	<b>AmAdera</b> siTi kaleja khuba bhAla	POS: Pronoun; Suffixes: -r (possessive)
	AnandamaTha <b>baNkimachandra</b> kartRRika rachita	POS: Noun; Postposition: kartRRika (also dbArA and diYe)
k2	bhUmikampa sAjAno gochhAno <b>sha- haraTA</b> dhbansa karala	POS: Noun; Suffixes: -TA
	tini <b>buddhadebake</b> parameshbarera abatAra balena	POS: Noun; Suffixes: -ke

Table 2: Discussion on AnnCorra tags

## 2 Linguistic Challenges with Annotation

- (a) Differential Object marking
- (b) Non-Nominative Subjects
- (c) Complex Predicates
- (d) Non-finite clauses: Conditional, Concessive, Relative, participial clauses
- (e) Ambiguity (Coordination, Attachment)
- (f) Ellipsis
- (g) Non-projectivity Ex 1: I saw a man yesterday who was singing Ex 2: A hearing is scheduled on the issue today Ex 3: To his wife, John gave a fantastic gift Ex 4: Which house, John bought?
- (h) Particles

# 3 Tag Statistics

Statistics have been compiled for UD and AnnCorra tagging of the provided Hindi datasets. In order to get the markers, I took a text diff (difflib.ndiff) of the provided hindi word and its base form as given in the dataset. In order to do that, a conversion to wx format was necessary.

Table 12: 4-Grams (AnnCorra) and their frequencies

# 4 Error Analysis for automatic tagging

We have a detailed report of the automatic tagging done for assignment 4, where we trained a CRF model on tagged hindi data and attempted to predict results for an unseen test set.

For purposes of error analysis, I went through examples of sentences in the test set where less than 60% of the predicted tags were correct. There are 14 such sentences, and we attempt to analyse each one of them.

### 5 Discussion

### 5.1 Comparison of UD and AnnCorra

### 5.2 Need for new tags

#### 5.2.1 Intra-Chunk

propose any new intra-chunk tags you can think of with examples

## 5.2.2 Inter-Chunk

propose any new inter-chunk tags you can think of with examples.
